DEPARTMENT OF CONTINUING EDUCATION

INTERPRETING THE ENDOMETRIAL BIOPSY

A Multimedia Tutorial

November 20-21, 2010

at the

Brigham and Women's Hospital

COURSE DIRECTOR

George L. Mutter, MD

FACULTY

**Christopher P. Crum, MD, George L. Mutter, MD,
Marisa R. Nucci, MD**

COURSE OBJECTIVE

This tutorial, offered by the Division of Women's and Perinatal Pathology at Brigham and Women's Hospital, is designed to review diagnostic interpretive problems in endometrial pathology, with an emphasis on unusual presentations of common disorders. At the end of the course participants should be able to:

- integrate pathophysiologic concepts into diagnostic practice
- recognize sampling and interpretive limitations in diagnosis of endometrial pathology
- discuss the diagnosis of endometrial precancers and apply EIN criteria
- diagnose hormonal effects on endometrial morphology

The course offers a unique format combining classroom teaching with digital presentation of known case examples and unknown case examples. Participants will be able to express their opinion of unknown cases using an electronic voting system, results of which will be summarized for the group. Each registrant will receive an illustrated course syllabus. This course is relevant to any pathologist engaged in the interpretation of endometrial biopsies, and clinicians managing patients with endometrial disease.

Attendance Limited to 55 Registrants
